Reinvestment of IDCW shall constitute a constructive payment of IDCW to the unitholders and a constructive receipt of the same amount from each unitholder for reinvestment in units. On reinvestment of IDCW, the number of units to the credit of the unitholders will increase to the extent of the IDCW reinvestment of IDCW by the applicable NAV as explained above. Section I – INTRODUCTION

A. RISK FACTORS

STANDARD RISK FACTORS

- Mutual Funds and securities investments are subject to market risks and there can be no assurance or guarantee that the objectives of the Scheme will be achieved.
- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down depending on the various factors and forces affecting capital markets and money markets.
- Past performance of the Sponsor / AMC / Mutual Fund does not guarantee future performance of the Scheme and may not necessarily provide a basis of comparison with other investments.
- Aditya Birla Sun Life Income Fund is the name of the Scheme and does not, in any manner, indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Schemes beyond the initial contribution of Rs. 1,00,000 made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme.

SCHEME SPECIFIC RISK FACTORS

RISK FACTORS ASSOCIATED WITH INVESTMENTS IN FIXED INCOME SECURITIES:

- **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- **Credit Risk:** In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme has invested in Government securities, there is no credit risk to that extent.

- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation Yield-to-Maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is today's characteristic of the Indian fixed income market.
- **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- Different types of securities in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly the scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively more risky than bonds, which are AAA rated.
- Investment in unrated securities may be riskier compared to investment in rated instruments due to non-availability of third party assessment on the repayment capability of the issuer. As the securities are unrated, an independent opinion of the rating agency on the repayment capability of the issuer will not be available. However, the Mutual Fund will carry out internal assessment & evaluate creditworthiness for all unrated instruments in which the Fund Manger plans to make investments. In addition to this, any investment in unrated securities will be carried out in accordance with SEBI (MF) Regulations, as amended from time to time.
- **Pre-payment Risk:** Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- **Concentration Risk:** The Scheme portfolio may have higher exposure to a single sector, subject to maximum of 25% of net assets as specified in this SID, depending upon availability of issuances in the market at the time of investment, resulting in higher concentration risk. Any change in government policy / business environment relevant to the sector may have an adverse impact on the portfolio.
- The above are some of the common risks associated with investments in fixed income and money market securities. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

RISK FACTORS ASSOCIATED WITH INVESTMENTS IN FOREIGN SECURITIES:

- Investments in International (overseas) securities including Exchange Traded Funds involves increased risk and volatility, not typically associated with domestic investing, due to changes in currency exchange rates, foreign government regulations, differences in auditing and accounting standards, potential political and economic instability, limited liquidity, and volatile prices. Further, risks associated with introduction of extraordinary exchange control, economic deterioration, and changes in bi-lateral relationships.
- To the extent the assets of the scheme are invested in overseas financial assets, there may be risks associated with currency movements, restrictions on repatriation and transaction procedures in overseas market. Further, the repatriation of capital to India may also be hampered by changes in regulations or political circumstances as well as the application to it of other restrictions on investment. In addition, country risks would include events such as introduction of extraordinary exchange controls, economic deterioration, bi-lateral conflict leading to immobilisation of the overseas financial assets and the prevalent tax laws of the respective jurisdiction for execution of trades or otherwise.
- **Currency Risk:** The schemes may invest in securities denominated in a broad range of currencies and may maintain cash in such currencies. As a consequence, fluctuations in the value of such currencies against the currency denomination of the relevant scheme will have a corresponding impact on the value of the portfolio. Furthermore, investors should be aware that movements in the rate of exchange between the currency of denomination of a fund and their home currency will affect the value of their shareholding when measured in their home currency.
- **Country Risk:** The Country risk arises from the inability of a country, to meet its financial obligations. It is the risk encompassing economic, social and political conditions in a foreign country, which might adversely affect foreign investors' financial interests.
- The Scheme may also invest in Foreign Securities as permitted by Reserve Bank of India and Securities and Exchange Board of India. To the extent that some part of the assets of the Schemes may be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by the changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital also may be hampered by changes in regulations concerning exchange controls or political circumstances as well as all other restrictions on investments as applicable.

RISK FACTORS ASSOCIATED WITH INVESTMENTS IN DERIVATIVES:

- As and when any Scheme trades in the derivatives market there are risk factors and issues concerning the use of derivatives that investors should understand. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an

understanding not only of the underlying instrument but also of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that loss may be sustained by the portfolio as a result of the failure of another party (usually referred as the “counter party”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value. Besides the price of the underlying asset, the volatility, tenor and interest rates affect the pricing of derivatives. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

- Derivative trades involve execution risks, whereby the rates seen on the screen may not be the rate at which ultimate execution takes place.
- The options buyer’s risk is limited to the premium paid, while the risk of an options writer is unlimited. However, the gains of an options writer are limited to the premiums earned.
- The writer of a put option bears the risk of loss if the value of the underlying asset declines below the exercise price. The writer of a call option bears a risk of loss if the value of the underlying asset increases above the exercise price.
- Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks.
- Risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and potential high volatility of the futures markets.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

RISKS FACTORS ASSOCIATED WITH INVESTMENTS IN SECURITISED DEBT:

Domestic securitised debt assets would be in the nature of Mortgage backed securities (MBS) and Asset backed securities (ABS) with underlying pool of assets and receivables like Housing Loans, Auto loans and corporate loans. The Securitised debt assets and the underlying asset classes like housing loans, Auto Loans and Corporate loans have the following risk factors.

- **Limited Recourse and Credit Risk:** Certificates issued on investment in securitised debt represent a beneficial interest in the underlying receivables and there is no obligation on the issuer, seller or the originator in that regard. Defaults on the underlying loan can adversely affect the pay outs to the investors (i.e. the Scheme) and thereby, adversely affect the NAV of the Scheme. While it is possible to repossess and sell the underlying asset, various factors can delay or prevent repossession and the price obtained on sale of such assets may be low.
- **Bankruptcy Risk:** If the originator of securitised debt instruments in which the Scheme invests is subject to bankruptcy proceedings and the court in such proceedings concludes that the sale of the assets from originator to the trust was not a 'true sale', then the Scheme could experience losses or delays in the payments due. Normally, care is taken in structuring the securitization transaction so as to minimize the risk of the sale to the trust not being construed as a 'true sale'.
- **Risk of Co-mingling:** Servicers in a securitization transaction normally deposit all payments received from the obligors into a collection account. However, there could be a time gap between collection by a servicer and depositing the same into the collection account. In this interim period, collections from the loan agreements by the servicer may not be segregated from other funds of the servicer. If the servicer fails to remit such funds due to investors, investors in the Scheme may be exposed to a potential loss.

Risks associated with Mortgage Backed Securities (MBS) - Housing Loans

- **Prepayment Risk:** The fund may receive payment of monthly payouts earlier than scheduled. Prepayments shorten the life of the instrument to an extent that cannot be fully predicted. The rate of prepayments may be influenced by a variety of economic, social and other factors.
- **Credit Risk:** Delinquencies may happen which would reduce the principal amount. Typically MBS structures come with credit enhancement in variety of forms. If delinquencies are higher than the amount available in the credit enhancement facility than the monthly payouts to the fund would reduce. Historically, it has been observed that housing loans have lower default rates as compared to other forms of credit.
- **Liquidity Risk:** Historically the secondary market volume of securitised papers has been limited. This could limit the ability of the fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.
- **Conversion risk:** Conversion of loans from fixed rate to floating rate loans and vice versa could lead to a change in the expected cash flows from the loans.

Risks associated with Asset Backed Securities (ABS)-Auto Loans.

- **Prepayment Risk:** The fund may receive payment of monthly payouts earlier than scheduled. Prepayments shorten the life of the instrument to an extent that cannot be fully predicted. The rate of prepayments may be influenced by a variety of economic, social and other factors. Prepayments in auto loans is lower than housing loans as the shorter tenor of auto loans makes it economically unattractive to prepay after considering the prepayment charges.
- **Credit Risk:** Delinquencies may happen which would reduce the principal amount. Typically ABS structures come with credit enhancement in variety of forms. If delinquencies are higher than the amount available in the credit enhancement facility than the monthly payouts to the fund would reduce. Typically auto loans carry higher risk than MBS as the value retention of the underlying asset is higher in MBS as compared to the underlying asset of ABS.
- **Liquidity Risk:** Historically the secondary market volume of securitised papers has been limited. This could limit the ability of the fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.
- **Conversion risk:** Conversion of loans from fixed rate to floating rate loans and vice versa could lead to a change in the expected cash flows from the loans.

Risks associated with Asset Backed Securities (ABS) - Corporate Loans

- **Credit Risk:** The fund has an exposure to the Borrower/Borrowers and servicing of the instrument depends on the credit risk of the Borrower. The value of the instrument would fluctuate depending upon the changes in the perceived level of credit risk as well as any actual default.
- **Prepayment Risk:** The Borrower may prepay the receivables prior to their respective due dates. This may result in a change in the yield and tenor for the fund.
- **Limited Liquidity and Price Risk:** Historically the secondary market volume of securitised papers has been limited. This could limit the ability of the fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.

RISKS FACTORS ASSOCIATED WITH INVESTMENTS IN REPO TRANSACTIONS IN CORPORATE DEBT SECURITIES:

In repo transactions, also known as a repo or sale repurchase agreement, securities are sold with the seller agreeing to buy them back at later date. The repurchase price should be greater than the original sale price, the difference effectively representing interest. A repo is economically similar to a secured loan, with the buyer receiving corporate debt securities as collateral to protect against default. The Scheme may invest in repo of corporate debt securities which are subject to the following risks:

- **Counterparty Risk:** This refers to the inability of the seller to meet the obligation to buy back securities at the contracted price on the contracted date. The Investment Manager will endeavour to manage counterparty risk by dealing only with counterparties, having strong credit profiles, approved by our credit risk analysis team. The exposure to each counterparty will be within the overall approved credit limits. Also the counterparty risk is to an extent mitigated by taking collateral equivalent in value to the transaction after knocking off a minimum haircut on the intrinsic value of the collateral. In the event of default by the repo counterparty, the scheme shall have recourse to the corporate debt securities.
- **Collateral Risk:** Collateral risk arises when the market value of the securities is inadequate to meet the repo obligations. This risk is mitigated by restricting participation in repo transactions only in AA or equivalent and above rated money market and corporate debt securities. Any rating downgrade will tantamount to either an early termination of the repo agreement or a call for fresh margin to meet the minimum haircut requirement. In addition, the Investment manager may apply a higher haircut on the underlying security than mentioned above to adjust for the illiquidity and interest rate risk on the underlying instrument. The adequacy of the collateral will be monitored on a daily basis by considering the daily market value & applying the prescribed haircut. The fund manager shall then arrange for additional collateral from the counterparty, within a period of 1 business day. If the counterparty is not able to top-up either in form of cash / collateral, it shall tantamount to early termination of the repo agreement.

RISKS FACTORS ASSOCIATED WITH CREATION OF SEGREGATED PORTFOLIO:

Different types of securities in which the scheme would invest carry different levels and types of risk as given in the Scheme Information Document of the scheme. In addition to the same, unitholders are requested to also note the following risks with respect to Segregated Portfolio:

Liquidity Risk: A lower level of liquidity affecting an individual security (ies) or an entire market may have an adverse bearing on the value of the Segregated Scheme's assets. This may more importantly affect the ability to sell particular securities with minimal impact cost as and when necessary to meet requirement of liquidity or to sell securities in response to triggers such as a specific economic/corporate event. Trading volumes, settlement periods and transfer procedures

may restrict the liquidity of a few of the investments. This may impact the NAV of the segregated portfolio and could result into potential loss to the Unit holders.

Credit risk: The scheme's risk may increase or decrease depending upon its investment pattern. E.g. corporate bonds carry a higher amount of risk than Government securities. Further even among corporate bonds, bonds, which are AA rated, are comparatively more risky than bonds, which are AAA rated. Investment in unrated securities may be riskier compared to investment in rated instruments due to non-availability of third party assessment on the repayment capability of the issuer. As the securities are unrated, an independent opinion of the rating agency on the repayment capability of the issuer will not be available. The issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down. This may impact the NAV of the segregated portfolio and resultant loss to the Unit holders.

Listing of units: Listing of units of segregated portfolio in recognized stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further, trading price of units on the stock market may be significantly lower than the prevailing NAV.

RISK FACTORS ASSOCIATED WITH INVESTMENTS IN UNITS OF REITS AND INVITS:

- **Price-Risk or Interest-Rate Risk:** REITs & InvITs run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- **Credit Risk:** In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. REITs & InvITs are likely to have volatile cash flows as the repayment dates would not necessarily be pre scheduled.
- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation Yield-to-Maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. As these products are new to the market they are likely to be exposed to liquidity risk.
- **Reinvestment Risk:** Investments in REITs & InvITs may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

The above are some of the common risks associated with investments in REITs & InvITs. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

Liquidity Risk Management Framework:

In accordance with SEBI circular and AMFI guidelines (issued from time to time), the AMC has put in place the Liquidity Risk Management Framework which monitors the liquidity risk. As per the prescribed guidelines, the liquidity ratios are calculated and liquid assets are maintained on a daily basis at scheme level for all open-ended schemes (except Overnight Fund, Gilt Fund and Gilt Fund with 10-year constant duration). These ratios address the potential liquidity risk scenarios upto 99% confidence interval. The guidelines also outline the action plan in case there is a difference between actual outcome and projected outcome. Further, the AMC monitors asset-liability mismatch requirement which addresses potential liquidity requirement over a 90-day period and relevant asset side liquidity to be maintained as prescribed by the SEBI circular.

The Scheme has adopted the SEBI circular and AMFI guidelines on Potential Risk Matrix, Risk-o-meter and Swing Pricing, where applicable.

Stress testing:

In accordance with SEBI circular and AMFI guidelines (issued from time to time), the AMC carries out stress testing for all open ended debt schemes (except overnight scheme). Stress testing covers impact on the scheme NAV on account of interest rate risk, credit risk and liquidity risk.

BACKSTOP FACILITY IN FORM OF INVESTMENT IN CORPORATE DEBT MARKET DEVELOPMENT FUND (CDMDF):

CDMDF is set up as a scheme of the Trust registered as an Alternative Investment Fund ('AIF') in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 ("AIF Regulations"). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified debt-oriented MF schemes) and sell as markets recover. The CDMDF will thus act as a key

enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI. Thus, this backstop facility will help fund managers of the aforementioned Schemes to better generate liquidity during market dislocation to help the schemes fulfill liquidity obligations under stress situation.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023, on Investment by Mutual Fund Schemes in units of Corporate Debt Market Development Fund, the aforementioned schemes shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF'). An incremental contribution to CDMDF shall be made every six months to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

Investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

Investors are requested to read detailed disclosure on investment of the schemes in the CDMDF as listed in sub-section "C. Asset Allocation and Investment Pattern and sub-section "D. Investment by Scheme" in Section "Section II- Information about the scheme".

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme. In case the Scheme does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

Section II – INFORMATION ABOUT THE SCHEME

A. TYPE OF THE SCHEME

Aditya Birla Sun Life Income Fund (ABSLIF) is An open ended medium term debt scheme investing in instruments such that the Macaulay duration of the portfolio is between 4-7 years. A relatively high interest rate risk and moderate credit risk.

This Scheme does not guarantee any returns

B. INVESTMENT OBJECTIVE

The objective of the scheme is to generate consistent income, through superior yields on its investments, at relatively moderate levels of risk through diversified research based investment approach. This income maybe complemented by price changes of instruments in the portfolio.

C. ASSET ALLOCATION AND INVESTMENT PATTERN

Under normal circumstances, the asset allocation pattern shall be as under:

(%age of net assets)

Instruments	Asset Allocation Range	Risk profile
Debt and Money Market Instruments	90% - 100%	Low to Medium
Units issued by REITs & InvITs	0-10%	Medium to high

Macaulay duration of the portfolio will be between 4 years-7 years.

However, fund manager, in the interest of investors, may reduce the portfolio duration of the schemes upto one year, in case he has a view on interest rate movements in light of anticipated adverse situation. In such scenario, the asset allocation will be as under:

(% age of net assets)

Instruments	Asset Allocation Range	Risk profile
Debt and Money Market Instruments	90% - 100%	Low to Medium
Units issued by REITs & InvITs	0-10%	Medium to high

Macaulay duration of the portfolio under anticipated adverse situation will be 1 year to 7 years.

The Scheme may invest a maximum of 50% in securitised debt.

The scheme may also invest upto 75% of the portfolio (i.e. net assets including cash) in such derivative instruments as may be introduced from time to time subject to framework specified by SEBI, for the purpose of hedging and portfolio balancing and other uses as may be permitted under SEBI Regulations.

Under normal circumstances this scheme shall not have an exposure of more than 25% of its net assets in foreign securities. However, the AMC with a view to protecting the interests of the investors, may increase exposure in foreign securities as deemed fit from time to time.

In accordance with the requirement of Regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on Investment by Mutual Fund Schemes and AMCs in units of Corporate Debt Market Development Fund, scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF') within 10 working days from the request of CDMDF. Further, an incremental contribution to CDMDF shall be made every six months within 10 working days from the end of half year starting from December 2023 to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

However, in case of winding up of contributing Scheme, inter-scheme transfers within the same Mutual Fund or across Mutual Funds may be undertaken.

Further, investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes (including applicable Investment limits) and the calculations of Potential Risk Class (PRC) Matrix, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF.

As per SEBI Circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/152 dated September 06, 2023, for calculation of asset allocation limits of the Scheme in terms of Part IV of Chapter 2 on 'Categorization and Rationalization of Mutual Fund Schemes' of Master Circular for Mutual Funds dated May 19, 2023, investment in units of CDMDF shall be excluded from base of net assets.

Change in Asset Allocation

In the event of deviations from asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of AMC), the Fund Manager will carry out rebalancing within 30 business days in terms of para 2.9 of SEBI Master Circular on Mutual Funds dated May 19, 2023. Where the portfolio is not rebalanced within 30 business days, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment Committee, if so desires, can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period. In case the portfolio of scheme is not rebalanced within the extended timelines, AMCs shall not be permitted to launch any new scheme and exit load shall not be levied to the investors exiting the Scheme, till the time the portfolio is rebalanced.

Further, in terms of para 2.9 of SEBI Master Circular on Mutual Funds dated May 19, 2023, the AMC shall report the deviation to the Trustees at each stage. In case the AUM of deviated portfolio is more than 10% of the AUM of main portfolio of Scheme, the AMC shall immediately disclose the same to the investors through SMS and email / letter including details of portfolio not rebalanced. Subsequently, the AMC shall also immediately communicate to investors through SMS and email / letter when the portfolio is rebalanced. Additionally, the AMC shall disclose the deviation from the mandated asset allocation to investors along with periodic portfolio disclosures as specified by SEBI from the date of lapse of mandated plus extended rebalancing timelines.

D. INVESTMENT STRATEGY

As the Scheme is an income scheme, the investment strategy will reflect the relatively conservative character of the portfolio. The fixed income investment strategy would emphasize investment in instruments that generate consistently superior yields at low levels of risk. Rigorous indepth credit evaluation and analysis aimed at ascertaining both the short term financial health and long term solvency of the debt issuers will be carried out by ABSLAMC's research team. In addition, criteria such as sound corporate managements, prospects of good future growth and strong past performance will be considered. Essentially, the focus would be on long term fundamentally driven values. However, short term opportunities would also be seized, provided they are supported by underlying values.

Portfolio Turnover

The scheme has no explicit constraints either to maintain or limit the portfolio turnover. Portfolio turnover will depend upon the circumstances prevalent at any time and would also depend on the extent of volatility in the market and inflows/outflows in the scheme. The Fund Manager will however endeavour to maintain a low portfolio turnover rate.

The Macaulay duration is the weighted average term to maturity of the cash flows from a bond. The weight of each cash flow is determined by dividing the present value of the cash flow by the price. Macaulay duration is frequently used by portfolio managers who use an immunization strategy.

Macaulay duration can be calculated:

$$\text{MacaulayDuration} = \frac{\sum_{t=1}^n \frac{t * C}{(1+y)^t} + \frac{n * M}{(1+y)^n}}{\text{Current Bond Price}}$$

Where:

- t = respective time period
- C = periodic coupon payment
- y = periodic yield

- n = total number of periods
- M = maturity value
- Current Bond Price = Present value of cash flows

The Macaulay duration can be viewed as the economic balance point of a group of cash flows. Another way to interpret the statistic is that it is the weighted average number of years an investor must maintain a position in the bond until the present value of the bond's cash flows equals the amount paid for the bond.

Factors Affecting Duration

A bond's price, maturity, coupon and yield to maturity all factor into the calculation of duration. All else equal, as maturity increases, duration increases. As a bond's coupon increases, its duration decreases. As interest rates increase, duration decreases and the bond's sensitivity to further interest rate increases goes down. Also, sinking fund in place, a scheduled prepayment before maturity and call provisions lower a bond's durations

Generally, for instruments issued by a non-Government entity (corporate/PSU bonds), the yield is higher than the yield on a Government Security with corresponding maturity. The difference, known as credit spread, depends on various factors including the credit rating of the entity.

Additional disclosures wrt Investments in Securitised Debt:

1. How the risk profile of securitized debt fits into the risk appetite of the scheme

Securitized Debt is a financial instrument (bond) whose interest and principal payments are backed by an underlying cash flow from another asset. The asset may be either a loan to a single counterparty or a pool of loans. The Scheme aim to invest in a portfolio of corporate debt securities maturing on or before the maturity of the Scheme. In this scheme the Fund manager ensures that the Scheme maturity matches the maturity of the underlying securities and as securitised debt instruments are relatively illiquid the fund manager buys these with the view to hold them till maturity. Thus, In line with the investment strategy of the Scheme and considering that there would be no intermediate redemption pressures for the Fund Manager, the Scheme may take exposure to rated Securitized Debt. Credit assessment of the underlying asset or loans is done to evaluate if it meets internal norms set by the AMC. Investment in these instruments will help the Scheme in aiming at reasonable returns. These returns come with a certain degree of risks which are covered separately in the Scheme Information Document. Accordingly, the risk profile of the securitised debt instruments matches that of the prospective investors of this Scheme and hence can be considered in the fund universe.

2. Policy relating to originators based on nature of originator, track record, exposure to securities classified as below investment grade or default, losses in earlier securitized debt, etc.

A securitization transaction involves sale of receivables by the originator (a bank, non-banking finance company, housing finance company, or a manufacturing/service company) to a Special Purpose Vehicle (SPV), typically set up in the form of a trust. Investors are issued rated Pass Through Certificates (PTCs), the proceeds of which are paid as consideration to the originator. In this manner, the originator, by selling his loan receivables to an SPV, receives consideration from investors much before the maturity of the underlying loans. Investors are paid from the collections of the underlying loans from borrowers. Typically, the transaction is provided with a limited amount of credit enhancement (as stipulated by the rating agency for a target rating), which provides protection to investors against defaults by the underlying borrowers.

The scheme will invest in instruments of the originator only if the originator has an investment grade rating. Over and above the credit rating assigned by credit rating agencies to the originator, ABSLMF will conduct an additional evaluation on

- Previous track record on origination, servicing and performance of existing pools
- Willingness to pay, through credit enhancement facilities etc.
- Ability to pay
- Business risk assessment, wherein following factors are considered:
 - Outlook for the economy (domestic and global)
 - Outlook for the industry
 - Originator/Pool specific factors

In addition a detailed review and assessment of rating rationale is done including interactions with the company as well as agency. For single loan PTC, credit evaluation of the underlying corporate will be carried out as with any other debt instruments.

3. Risk mitigation strategies for investments with each kind of originator

In terms of specific risks attached to securitization, each asset class would have different underlying risks, however, residential mortgages are supposed to be having lower default rates as an asset class. On the other hand,

repossession and subsequent recovery of commercial vehicles and other auto assets is fairly easier and better compared to mortgages. Some of the asset classes such as personal loans, credit card receivables etc., being unsecured credits in nature, may witness higher default rates. As regards corporate loans/receivables, depending upon the nature of the underlying security for the loan or the nature of the receivable the risks would correspondingly fluctuate. However, the credit enhancement stipulated by rating agencies for such asset class pools is typically much higher, which helps in making their overall risks comparable to other AAA rated asset classes.

The Scheme may invest in securitized debt assets. The asset may be either a loan to a single counterparty or a pool of loans. The Scheme intends to invest in securitized instruments rated by a SEBI recognized credit rating agency. In addition, some specific risk mitigation measures will include:

Limited Recourse and Credit Risk: Certificates issued on investment in securitized debt represent a beneficial interest in the underlying receivables and there is no obligation on the issuer, seller or the originator in that regard. Defaults on the underlying loan can adversely affect the pay outs to the investors (i.e. the Scheme) and thereby, adversely affect the NAV of the Scheme.

Risk Mitigation: In addition to careful scrutiny of credit profile of borrower/pool additional security in the form of adequate cash collaterals and other securities may be obtained to ensure that they all qualify for similar rating.

Bankruptcy Risk: If the originator of securitized debt instruments in which the Scheme invests is subject to bankruptcy proceedings and the court in such proceedings concludes that the sale of the assets from originator to the trust was not a 'true sale', and then the Scheme could experience losses or delays in the payments due.

Risk Mitigation: Normally, specific care is taken in structuring the securitization transaction so as to minimize the risk of the sale to the trust not being construed as a 'true sale'. It is also in the interest of the originator to demonstrate the transaction as a true sell to get the necessary revenue recognition and tax benefits.

Limited Liquidity and Price risk

Presently, secondary market for securitized papers is not very liquid. There is no assurance that a deep secondary market will develop for such securities. This could limit the ability of the investor to resell them. Even if a secondary market develops and sales were to take place, these secondary transactions may be at a discount to the initial issue price due to changes in the interest rate structure.

Risk Mitigation: Securitized debt instruments are relatively illiquid in the secondary market and hence they are generally held to maturity. The liquidity risk and HTM nature is taken into consideration at the time of analyzing the appropriateness of the securitization.

Risks due to possible prepayments: Weighted Tenor / Yield

Asset securitization is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments Full prepayment of underlying loan contract may arise under any of the following circumstances;

- Obligor pays the Receivable due from him at any time prior to the scheduled maturity date of that Receivable; or
- Receivable is required to be repurchased by the Seller consequent to its inability to rectify a material misrepresentation with respect to that Receivable; or
- The Servicer recognizing a contract as a defaulted contract and hence repossessing the underlying Asset and selling the same
- In the event of prepayments, investors may be exposed to changes in tenor and yield.

Risk Mitigation: A certain amount of prepayments is assumed in the calculations at the time of purchase based on historical trends and estimates. Further a stress case estimate is calculated and additional margins are built in.

Bankruptcy of the Investor's Agent

If Investor's agent becomes subject to bankruptcy proceedings and the court in the bankruptcy proceedings concludes that the recourse of Investor's Agent to the assets/receivables is not in its capacity as agent/Trustee but in its personal capacity, then an Investor could experience losses or delays in the payments due under the swap agreement.

Risk Mitigation: All possible care is normally taken in structuring the transaction and drafting the underlying documents so as to provide that the assets/receivables if and when held by Investor's Agent is held as agent and in Trust for the Investors and shall not form part of the personal assets of Investor's Agent.

4. The level of diversification with respect to the underlying assets, and risk mitigation measures for less diversified investments

Framework that will be applied while evaluating investment decision relating to a pool securitization transaction:

Characteristics / Type of Pool	Mortgage Loan	Commercial Vehicle & Construction Equipment	Car	Two Wheeler	Micro Finance Pools	Personal Loans	Single Sell Downs	Others
Approx. Avg Maturity	60-120 Months	12-48 Months	12-48 Months	12-24 Months	12 Months	12-36 Months	NA	NA

Collateral Margin (incl. Cash, Guarantees, Excess Interest Spread, Subordinate Tranche)	5-20%	5-20%	5-20%	5-20%	10-30%	10-30%	NA	NA
Avg Loan to Value Ratio	< 90%	< 90%	< 90%	< 90%	NA	NA	NA	NA
Avg Seasoning of the Pool	6-12 Months	3-6 Months	3-6 Months	3-6 Months	3-12 Weeks	1-3 Months	0-3 Months	NA
Max. Single Exposure Range	3-4%	3-4%	Retail	Retail	Retail	Retail	NA	NA
Avg Single Exposure Range %	1-1.5%	1.5-2%	Retail	Retail	Retail	Retail	NA	NA

Information illustrated in the Table above, is based on the current scenario relating to Securitized Debt market and is subject to change depending upon the change in the related factors.

We endeavor to consider some of the important risk mitigating factors for securitized pool i.e.

- Average original maturity of the pool: based on different asset classes and current market practices
- Collateral margin including cash collateral and other credit enhancements
- Loan to Value Ratio
- Average seasoning of the pool, which is a key indicator of past pool performance
- Default rate distribution
- Geographical Distribution
- Maximum single exposure: Retail pools (passenger cars, 2-wheelers, Micro finance, personal loans, etc) are generally well diversified with maximum and average single exposure limits within 1%.

As illustrated above, these factors vary for different asset classes and would be based on interactions with each originator as well as the credit rating agency.

5. Minimum retention period of the debt by originator prior to securitization

The Mutual Fund will follow the guidelines on minimum holding period requirements as laid down by SEBI and RBI from time to time.

6. Minimum retention percentage by originator of debts to be securitized

We will follow the guidelines on minimum holding period requirements as laid down by SEBI and RBI from time to time.

7. The mechanism to tackle conflict of interest when the mutual fund invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme of the fund

Investments made by the scheme in any asset are done based on the requirements of the scheme and is in accordance with the investment policy. All Investments are made entirely at an arm's length basis with no consideration of any existing / consequent investments by any party related to the transaction (originator, issuer, borrower etc.). Investments made in Securitized debt are made as per the Investment pattern of the Scheme and are done after detailed analysis of the underlying asset. There might be instances of Originator /obligor investing in the same scheme but both the transactions are at arm's length and avoid any conflict of interest. In addition to internal controls in the fixed income investment process, there is regular monitoring by the compliance team, risk management group, and internal review teams. Normally the issuer who is securitizing instrument is in need of money and is unlikely to have long term surplus to invest in mutual fund scheme.

8. In general, the resources and mechanism of individual risk assessment with the AMC for monitoring investment in securitized debt

The risk assessment process for securitized debt, as detailed in the preceding paragraphs, is same as any other credit. The investments in securitized debt are done after appropriate research by credit analyst. The ratings are monitored for any movement. The entire securitized portfolio is published in the fact sheet and disclosed in the web site for public consumption with details of underlying exposure and originator.

Trading In Derivatives

SEBI has permitted Mutual Funds to participate in derivatives trading subject to observance of guidelines issued by SEBI in this behalf. Accordingly, Mutual Funds may use various derivative products from time to time, as would be available and permitted by SEBI / RBI, in an attempt to protect the value of the portfolio and enhance Unitholders' interest.

The scheme intends to use derivatives instruments like interest rate swaps, forward rate agreements or such other derivative instruments as may be introduced from time to time for the purpose of hedging, portfolio balancing as may be permitted under SEBI (MF) Regulations.

Derivatives can be either exchange traded or can be Over the Counter (OTC). Exchange traded derivatives are listed and traded on Stock Exchanges whereas OTC derivative transactions are generally structured between two counterparties. Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to

identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

The Mutual Fund would comply with the provisions of para 7.5, 7.6, 12.24, 12.25 and 12.25.8 of SEBI Master Circular on Mutual Funds dated May 19, 2023, such other amendments issued by SEBI from time to time while trading in derivatives.

Exposure to Derivatives

Further, the exposure limits for trading in derivatives by Mutual Fund specified by SEBI para 12.24 and para 12.25.5 of SEBI Master Circular on Mutual Funds dated May 19, 2023, is as follows:

1. The cumulative gross exposure through equity, debt and derivative positions (including commodity and fixed income derivatives), repo transactions in corporate debt securities, other permitted securities/assets and such other securities/assets as may be permitted by the Board from time to time subject to regulatory approvals, if any should not exceed 100% of the net assets of the scheme.
2. The total exposure related to option premium paid must not exceed 20% of the net assets of the scheme.
3. Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.
4. Exposure due to hedging positions may not be included in the above mentioned limits subject to the following
 - Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
 - Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 1
 - Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
 - The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken
5. (a) Mutual Funds may enter into plain vanilla interest rate swaps for hedging purposes. The value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme.

(b) In case of participation in IRS is through over the counter transactions, the counter party has to be an entity recognized as a market maker by RBI and exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme. However, if mutual funds are transacting in IRS through an electronic trading platform offered by the Clearing Corporation of India Ltd. (CCIL) and CCIL is the central counterparty for such transactions guaranteeing settlement, the single counterparty limit of 10% shall not be applicable.

6. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point (1) above.
7. Definition of Exposure in case of derivatives positions

Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price * Lot Size * Number of Contracts
Short Future	Futures Price * Lot Size * Number of Contracts
Option bought	Option Premium Paid * Lot Size * Number of Contracts.

Interest Rate Swaps (IRS)

An IRS is an agreement between two parties to exchange stated interest obligations for an agreed period in respect of a notional principal amount. The most common form is a fixed to floating rate swap where one party receives a fixed (pre-determined) rate of interest while other receives a floating (variable) rate of interest.

Forward Rate Agreement (FRA)

An FRA is basically a forward starting IRS. It is an agreement between two parties to pay or receive the difference between an agreed fixed rate (the FRA rate) and the interest rate (reference rate) prevailing on a stipulated future date, based on a notional principal amount for an agreed period. The only cash flow is the difference between the FRA rate and the reference rate. As is the case with IRS, the notional amounts are not exchanged in FRAs.

Example of a derivatives transaction

Basic Structure of a Swap

Bank A has a 6 month Rs. 10 crore liability, currently being deployed in call. Bank B has a ₹ 10 crore 6 month asset, being funded through call. Both banks are running an interest rate risk. To hedge this interest rate risk, they can enter

into a 6 month MIBOR (Mumbai Inter Bank Offered Rate) swap. Through this swap, A will receive a fixed preagreed rate (say 7%) and pay "call" on the NSE MIBOR ("the benchmark rate"). His paying at "call" on the benchmark rate will neutralise the interest rate risk of lending in call. B will pay 7% and receive interest at the benchmark rate. His receiving of "call" on the benchmark rate will neutralise his interest rate risk arising from his call borrowing. The mechanism is as follows:

- Assume the swap is for Rs. 10 crore March 1st to September 1st. A is a fixed rate receiver at 7% and B is a floating rate receiver at the overnight compounded rate.
- On March 1st, A and B will exchange only an agreement of having entered this swap. This documentation would be as per International Securities Dealers Association (ISDA).
- On a daily basis, the benchmark rate fixed by NSE will be tracked by them. On September 1st they will calculate the following:

A is entitled to receive interest on Rs. 10 crore at 7% for 184 days i.e. Rs. 35.28 lakh, (this amount is known at the time the swap was concluded) and will pay the compounded benchmark rate.

B is entitled to receive daily compounded call rate for 184 days & pay 7% fixed.

On September 1st, if the total interest on the daily overnight compounded benchmark rate is higher than Rs. 35.28 lakhs, A will pay B the difference. If the daily compounded benchmark rate is lower, then B will pay A the difference.

Effectively Bank A earns interest at the rate of 7% p.a. for six months without lending money for 6 months fixed, while Bank B pays interest @ 7% p.a. for 6 months on Rs. 10 crore, without borrowing for 6 months fixed. As per abovesaid RBI circulars, mutual funds are permitted to do Interest Rate Swaps/Forward Rate Agreements, for hedging purposes only. Accordingly, the AMC would undertake the same for similar purposes only. IRS and FRAs do also have inherent credit and settlement risks. However, these risks are substantially reduced as they are limited to the interest streams and not the notional principal amounts.

Investment in Foreign Securities

The Schemes depending upon the Fund Manager's views would like to seek investment opportunities in the ADR/GDR/Foreign Securities, in accordance with guidelines stipulated in this regard by SEBI and RBI from time to time. Investing in overseas markets can be rewarding from returns perspective as well as risk diversification perspective.

Conditions for investments in Foreign Securities

In accordance with Guidelines issued by SEBI from time to time, Mutual funds can invest in Foreign securities. Currently, Mutual Funds can make overseas investments subject to a maximum of US \$ 1 billion per mutual fund within the overall industry limit of US \$7 billion. US \$1 billion would be reserved for each Mutual Fund individually, within the overall industry limit of US \$7 billion.

The scheme may make investment in Foreign Securities specified by SEBI from time to time and upto the limits specified by SEBI from time to time. The scheme shall also ensure compliance with the provisions of para 12.19 and 12.20 of SEBI Master Circular on Mutual Funds dated May 19, 2023.

The scheme may make investments in following foreign securities:

1. Initial and follow on public offerings for listing at recognized stock exchanges overseas
2. Foreign debt securities in the countries with fully convertible currencies, short term as well as long term debt instruments with rating not below investment grade by accredited/registered credit rating agencies
3. Money market instruments rated not below investment grade
4. Repos in the form of investment, where the counterparty is rated not below investment grade; repos should not however, involve any borrowing of funds by mutual funds
5. Government securities where the countries are rated not below investment grade
6. Derivatives traded on recognized stock exchanges overseas only for hedging and portfolio balancing with underlying as securities
7. Short term deposits with banks overseas where the issuer is rated not below investment grade
8. Units/securities issued by overseas mutual funds or unit trusts registered with overseas regulators and investing in (a) aforesaid securities, (b) Real Estate Investment Trusts (REITs) listed in recognised stock exchanges and (c) unlisted overseas securities (not exceeding 10% of their net assets).

Investment in overseas securities shall be made in accordance with the requirements stipulated by SEBI and RBI from time to time.

It is the Investment Manager's belief that Foreign Securities offer new investment and portfolio diversification opportunities into multi-market and multi-currency products. The Fund would look to invest in Foreign Securities in order to diversify the portfolio in terms of variety of instruments held and enhance returns by taking advantage of market movements in global markets, which may or may not be in sync with the Indian markets. The Fund will look to identify and capture profitable opportunities as and when they arise.

However, such investments also entail additional risks. Such investment opportunities may be pursued by the Investment Manager provided they are considered appropriate in terms of the overall investment objectives of the Scheme. The Scheme may then, if necessary, seek permission from SEBI and RBI to invest abroad in accordance with the investment objectives of the Scheme and in accordance with any guidelines issued by SEBI / RBI from time to time.

Since the Scheme would invest only partially in Foreign Securities, there may not be readily available and widely accepted benchmarks to measure performance of the Scheme. To manage risks associated with foreign currency, the Fund may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated by SEBI / RBI from time to time.

Offshore investments will be made subject to any / all approvals and conditions thereof as may be stipulated by SEBI / RBI being fulfilled and provided such investments do not result in expenses to the Fund in excess of the ceiling, if any, on expenses prescribed by SEBI for offshore investment, and if no such ceiling is prescribed by SEBI, the expenses to the Scheme(s) shall be limited to the level which, in the opinion of the Trustees, is reasonable and consistent with costs and expenses attendant to international investing. However, the expenses charged to the scheme, even if the scheme invests in foreign securities, will not exceed the limits specified under the SEBI (MF) Regulations, 1996. The Fund may, where necessary, appoint other intermediaries of repute as advisors, sub custodians, etc. for managing and administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceilings of expenses. The fees and expenses would illustratively include, besides the investment management fees, custody fees and costs, fees of appointed advisors and sub-managers, transaction costs and overseas regulatory costs.

The Mutual Fund shall appoint a dedicated fund manager for making overseas investments stipulated above.

Due Diligence

Boards of AMC's and Trustees shall exercise due diligence in making investment decisions in terms of para 12.19.3.2 of SEBI Master Circular on Mutual Funds dated May 19, 2023. They shall make a detailed analysis of risks and returns of overseas investment and how these investments would be in the interest of investors. All investment decisions shall be recorded in accordance with para 12.19.3.2 of SEBI Master Circular on Mutual Funds dated May 19, 2023.

Investment in Offshore Debt Securities

The Scheme may, with the approval of SEBI also invest in foreign debt securities in the countries with fully convertible currencies, short term as well as long term debt instruments with highest rating (foreign currency credit rating and not below investment grade) by accredited / registered credit rating agencies, say A-1/AAA by Standard & Poor, P-1/AAA by Moody's, F1/AAA by Fitch IBCA, etc. and the Scheme may also invest in government securities where the countries are AAA rated as provided in para 12.19.2.4 of SEBI Master Circular on Mutual Funds dated May 19, 2023 and as per any subsequent instructions of guidelines that may be issued by SEBI in this regard. Investments in foreign debt securities would be made in countries with fully convertible currency. An illustrative list of such countries includes Austria, Denmark, Finland, Germany, Netherlands, Norway, Singapore, Switzerland, USA, UK. However, such investments also entail additional risks. Such investment opportunities may be pursued by the Investment Manager provided they are considered appropriate in terms of the overall investment objectives of the Scheme. The Scheme may then, if necessary, seek permission from SEBI and RBI to invest abroad in accordance with the investment objectives of the Scheme and in accordance with any guidelines issued by SEBI / RBI from time to time. Since the Schemes would invest only partially in Foreign Securities, there may not be readily available and widely accepted benchmarks to measure performance of the Scheme. To manage risks associated with foreign currency, the Fund may use derivatives for efficient portfolio management including hedging and in accordance with conditions as may be stipulated by SEBI / RBI from time to time. Offshore investments will be made subject to any / all approvals and conditions thereof as may be stipulated by SEBI / RBI being fulfilled and provided such investments do not result in expenses to the Fund in excess of the ceiling, if any, on expenses prescribed by SEBI for offshore investment, and if no such ceiling is prescribed by SEBI, the expenses to the

Scheme(s) shall be limited to the level which, in the opinion of the Trustees, is reasonable and consistent with costs and expenses attendant to international investing. The Fund may, where necessary, appoint other intermediaries of repute as advisors, sub-custodians, etc. for managing and administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceilings of expenses. The fees and expenses would illustratively include, besides the investment management fees, custody fees and costs, fees of appointed advisors and sub-managers, transaction costs and overseas regulatory cost.

Overseas Debt Market

The nature and number of debt instruments available in international debt markets is very wide. In terms of diverse instruments as well as liquidity, overseas debt markets offer great depth and are extremely well-developed.

Investment in international debt greatly expands the universe of top quality debt, which is no longer restricted to the limited papers available in the domestic debt market. The higher rated overseas sovereign, quasi-government and corporate debt offer lower default risk in addition to offering a high degree of liquidity since these are traded across major international markets. Investments in rated international debt offer multiple benefits of risk reduction, a much wider universe of top quality debt and also potential gains from currency movements.

Investments in international markets are most often in U.S. dollars, though the Euro, Pound Sterling and the Yen are also major currencies. Though this market is geographically well-spread across global financial centres, the markets in the U.S., European Union and London offer the most liquidity and depth of instruments.

Besides factors specific to the country / issuer, international bond prices are influenced to a large extent by a number of other factors; chief among these are the international economic outlook, changes in interest rates in major economies, trading volumes in overseas markets, cross currency movements among major currencies, rating changes of countries / corporations and major political changes globally.

The current yields (as on September 30, 2023) in the US Bond Market are as follows:

Maturity	US Treasury yields (%)
3 months	5.55
2 years	5.03
5 years	4.60
10 years	4.59
30 years	4.73

The overseas securities markets offer new investment and portfolio diversification opportunities by enabling investments in the overseas markets. However, such investments also entail additional risks. Such investment opportunities may be pursued by the Scheme(s) provided they are considered appropriate in terms of the overall investment objectives of the Scheme(s).

Investment Process and Recording of Investment Decisions

The AMC through its various policies and procedures defines prudential and concentration limits to de-risk the portfolio. The investment management team is allowed full discretion to make sale and purchase decisions within the limits established. The responsibility for the investment decisions is with the portfolio managers and the CEO of the AMC does not have any role in the day to day decision making process. All the decisions will be recorded along with their justifications. The AMC and Trustee will review the performance of the scheme in their Board meetings. The performance would be compared with the performance of the benchmark index and with peer group in the industry.

Investments in the Scheme by the AMC, Sponsor, or their Associate in the Scheme

Pursuant to Regulation 25(16A) of the SEBI (MF) Regulations, 1996 and para 6.9 of SEBI Master Circular on Mutual Funds dated May 19, 2023, AMC will invest minimum amount as a percentage of AUM based on the risk associated with the Scheme and such investment will not be redeemed unless the Scheme is wound up.

The AMC will conduct quarterly review to ensure compliance with above requirement which may change either due to change in value of the AUM or in the risk value assigned to the scheme. The shortfall in value of the investment, if any, will be made good within 7 days of such review.

In addition to investments as mandated under Regulation 25(16A) of the Regulations as mentioned above, the AMC, may invest in the scheme during the continuous offer period subject to the SEBI (MF). As per the existing SEBI (MF) Regulations, the AMC will not charge investment management and advisory fee on the investment made by it in the scheme. The Sponsor, Trustee and their associates may invest in the scheme on an ongoing basis subject to SEBI (MF) Regulations & circulars issued by SEBI and to the extent permitted by its Board of Directors from time to time.

Pursuant to Regulation 43A of SEBI (Mutual Funds) Regulations, 1996 and SEBI circular no. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF. In case of delay in contribution by the Scheme and AMC, the AMC shall be liable to pay interest at fifteen percent (15%) per annum for the period of delay.

I. INVESTMENT RESTRICTIONS FOR THE SCHEME

All investments by the Scheme and the Mutual Fund will always be within the investment restrictions as specified in the SEBI (MF) Regulations. Pursuant to the Regulations, the following investment and other restrictions are presently applicable to the scheme:

- All investments by the Scheme shall be made only in listed or to be listed equity shares and equity related instruments
- In accordance with para 12.8 of SEBI Master Circular on Mutual Funds dated May 19, 2023 as amended from time to time, the scheme shall not invest more than:
 - a. 10% of its NAV in debt and money market securities rated AAA; or
 - b. 8% of its NAV in debt and money market securities rated AA; or
 - c. 6% of its NAV in debt and money market securities rated A and below issued by a single issuer.

The above investment limits may be extended by up to 2% of the NAV of the scheme with prior approval of the Board of Trustees and Board of Directors of the AMC, subject to compliance with the overall 12% limit specified in clause 1 of Seventh Schedule of MF Regulation.

The long term rating of issuers shall be considered for the money market instruments. However, if there is no long term rating available for the same issuer, then based on credit rating mapping of CRAs between short term and long term ratings, the most conservative long term rating shall be taken for a given short term rating. Exposure to government money market instruments such as TREPS on G-Sec/ T-bills shall be treated as exposure to government securities. Provided that such limit shall not be applicable for investments in Government Securities, treasury bills and

Triparty repo on Government securities or treasury bills:

Provided further that investments within such limit can be made in mortgaged backed securitised debt which are rated not below investment grade by a credit rating agency registered with the Board:

Provided further that such limit shall not be applicable for investments in case of debt exchange traded funds or such other funds as may be specified by the Board from time to time.

The scheme existing as on the date of aforesaid circular shall be grandfathered from these guidelines till the maturity of the underlying debt and money market securities.

- Investment in unrated debt and money market instruments (other than government securities, treasury bills, derivative products such as Interest Rate Swaps (IRS), Interest Rate Futures (IRF), etc.) by the Scheme shall not exceed 5% of the net assets of the Scheme. However, all such investments shall be made with the prior approval of the Board of AMC and Trustees.
- The Scheme shall not invest in unlisted debt instruments including commercial papers (CPs), other than (a) government securities, (b) other money market instruments and (c) derivative products such as Interest Rate Swaps (IRS), Interest Rate Futures (IRF), etc. which are used by mutual funds for hedging. However, mutual fund schemes may invest in unlisted Non-Convertible Debentures (NCDs) not exceeding 10% of the debt portfolio of the scheme subject to the condition that such unlisted NCDs have a simple structure (i.e. with fixed and uniform coupon, fixed maturity period, without any options, fully paid up upfront, without any credit enhancements or structured obligations) and are rated and secured with coupon payment frequency on monthly basis. Provided further that, the Scheme shall comply with the norms under this clause within the time and in the manner as may be specified by the Board.
- All investments by the Scheme in CPs would be made only in CPs which are listed or to be listed.
- The investment of the Scheme in the following instruments shall not exceed 10% of the debt portfolio of the Scheme and the group exposure in such instruments shall not exceed 5% of the debt portfolio of the Scheme:
 - i. Unsupported rating of debt instruments (i.e. without factoring-in credit enhancements) is below investment grade; and
 - ii. Supported rating of debt instruments (i.e. after factoring-in credit enhancement) is above investment grade
 The above limits shall not be applicable on investments in securitized debt instruments.
- Investment by the Scheme in debt instruments, having credit enhancements backed by equity shares directly or indirectly, shall have a minimum cover of 4 times considering the market value of such shares. Further, the investment in debt instruments having credit enhancements should be sufficiently covered to address the market volatility and reduce the inefficiencies of invoking of the pledge or cover, whenever required, without impacting the interest of the investors. In case of fall in the value of the cover below the specified limit, AMCs will initiate necessary steps to ensure protection of the interest of the investors.
- The Scheme may invest in other schemes under the same AMC or any other Mutual Fund without charging any fees, provided the aggregate inter-scheme investment made by all the Schemes under the same management or in schemes under management of any other Asset Management Company shall not exceed 5% of the Net Asset Value of the Fund. No investment management fees shall be charged for investing in other schemes of the fund or in the schemes of any other Mutual Fund.
- In reference with para 4.6 SEBI Master Circular on Mutual Funds dated May 19, 2023, the Scheme shall hold at least 10% of their net assets in liquid assets. For this purpose, 'liquid assets' shall include Cash, Government Securities, T-bills and Repo on Government Securities. In case, the exposure in such liquid assets / securities falls below the threshold mandated, the AMC shall ensure compliance with the above requirement before making any further investments.
- The fund under all its schemes should own more than ten per cent of any company's paid up capital carrying voting rights.
Provided, for investments in AMC or Trustee Company of other mutual fund, collective investment of sponsor of a mutual fund, its associate and/or its group company, and its AMC through Schemes should be considered for calculating 10% voting rights
- Transfer of investments from one scheme to another scheme in the Mutual Fund is permitted provided:

Provided further that sale of government security already contracted for purchase shall be permitted in accordance with the guidelines issued by the Reserve Bank of India in this regard.
- Pending deployment of funds of the Scheme in terms of its investment objectives, the Scheme may invest its funds in short term deposits of scheduled commercial banks, subject to the following guidelines for parking of funds in short term deposits of scheduled commercial banks, laid down by para 12.16 of SEBI Master Circular on Mutual Funds dated May 19, 2023 and such other guidelines as may be specified by SEBI from time to time:

2.Value Systematic Transfer Plan (Value STP):

Value Systematic Transfer Plan, is a facility (hereinafter referred as 'Value STP') wherein Unit holder(s) of eligible open-ended Scheme(s) of Aditya Birla Sun Life Mutual Fund [hereinafter referred to as "Fund"] can opt to systematically transfer amount(s), which may vary based on the value of investments already made/transferred under this facility, on the date of transfer at pre-determined intervals from open-ended Scheme(s) of the Fund [hereinafter referred to as "Transferor Scheme"] to the Growth Option of open-ended equity Scheme(s) of the Fund [hereinafter referred to as "Transferee Scheme"].

The key features of Value STP are mentioned below:

- a) In Value STP (as per the Frequency opted by the Unitholder i.e. Monthly or Quarterly) Unitholders will be eligible to transfer fixed amount per installment OR the amount as determined by the following formula whichever is higher:

[(First installment amount) X (Number of installments including the current installment)] less (Market Value of the investments through Value STP in the Transferee Scheme on the date of transfer).

If the amount of transfer as calculated by the above formula is less than Rs. 500, then the default amount of Rs.500 will be transferred to the Transferee Scheme on the trigger date.

However, in case of redemption or switch-out of Units allotted under Value STP in the Transferee Scheme, the balance instalments under Value STP will be processed for the fixed instalment amount only as specified by the Unitholder at the time of enrolment.

On the date of transfer, if the market value of the investments in the Transferee Scheme through Value STP is higher than the Investment Value for that period [(first installment amount) X (number of installments; including the current installment)], then there would be no STP on that trigger date effected from the Transferor Scheme.

- b) The first instalment under Value STP will be processed for the fixed instalment amount mentioned by the Unitholder at the time of enrolment.
- c) From the second instalment onwards, the amount to be transferred shall be computed as per formula stated in (a) above.

- d) The minimum number of installments and amount for enrollment to avail Value STP are as below:

Frequency	Trigger Dates	Minimum Value STP amount (Rs.)
Monthly	1st, 7th, 10th, 14th, 20th, 21st, 28th	For STP installments greater than Rs. 500 but less than Rs. 999, Unitholders are required to instruct for minimum 12 transfers of Rs.500 and in multiples of Rs. 1 thereafter. For STP installments of Rs. 1000 and above, Unitholders are required to instruct for minimum 6 transfers of Rs. 1000 and in multiples of Rs.1 thereafter.
Quarterly		

- e) The maximum amount of transfer under Value STP would be limited to twice the amount per instalment mentioned in the application form at the time of enrolment.
- f) In case none of the frequencies have been selected or in case of any ambiguity, Monthly frequency shall be treated as the default Frequency. If
- g) STP date is not specified or in case of any ambiguity then 7th Business Day of the month will be treated as default date.
- h) In case the date of transfer falls on a Non-Business Day, the immediate next Business Day will be considered for the purpose of determining the applicability of NAV.
- i) In case of valid enrolment forms received, indicating choice of option other than the Growth Option in the Transferee Scheme, it will be deemed as the Growth Option in Transferee Scheme and processed accordingly.
- j) A Single Value STP Enrolment Form can be filled for transfer into only one Scheme/Plan/Option.
- k) Unitholder has the right to discontinue Value STP at any time he/she so desires by sending a written request at least 7 (seven) days in advance to any of the offices of the Fund or its Authorised Collection Centres.

The key features of CATP are mentioned below:

- a) CATP is offered at Monthly and Quarterly intervals. In case none of the frequencies have been selected or in case of any ambiguity, Monthly frequency shall be treated as the default Frequency. Further, in case of folio(s)/account(s) with joint holder(s), the entire account value of the investment portfolio will be attributable under each such reportable person. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio. The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence. The legal charges related to recovery of the investments of the segregated portfolio will be charged to the segregated portfolio in proportion to the amount of recovery. However, the same will be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, will be borne by ABSLAMC. The costs related to segregated portfolio will in no case be charged to the main portfolio.

Monitoring by Trustees

In order to ensure timely recovery of investments of the segregated portfolio, Trustees will ensure that, the ABSLAMC puts in sincere efforts to recover the investments of the segregated portfolio. Upon recovery of money, whether partial or full, it will be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio. Further, an Action Taken Report (ATR) on the efforts made by the ABSLAMC to recover the investments of the segregated portfolio will be placed in every Trustee meeting till the investments are fully recovered/ written-off.

The Trustees will monitor the compliance of this circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.

In order to avoid mis-use of segregated portfolio, trustees will ensure that there is a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the scheme.

Creation of segregated portfolio will be optional and at the discretion of ABSLAMC.

Illustration of portfolio segregation

The below illustration explains the impact of portfolio segregation on account of the credit event on the Scheme and its investors.

Total Portfolio	Regular Plan	Direct Plan
Net Assets (A)	200.00	110.00
Units (B)	20.000	10.000
NAV per unit (A)/(B)	10.0000	11.0000

Assuming, the above portfolio has a security with market value of Rs. 20 which has got impacted by a credit event. Based on Trustees approval for segregation of portfolio, total portfolio would be split into main portfolio and segregated portfolio as given below:

Main Portfolio	Regular Plan	Direct Plan
-----------------------	---------------------	--------------------

	Net Assets before Segregation(A)	200.00	110.00
	Value of impacted security (B)	12.90	7.10
	Net Assets after segregation (C) = (A) – (B)	187.10	102.90
	Units (D)	20.000	10.000
	NAV per unit (C)/(D)	9.3548	10.2903
	Segregated Portfolio	Regular Plan	Direct Plan
	Value of impacted security segregated from Total portfolio	12.90	7.10
	Haircut @ 25%	3.23	1.77
	Net Assets after Haircut (A)	9.68	5.32
	Units (B)	20.000	10.000
	NAV per unit (A)/(B)	0.4839	0.5323
	Investor Holding	Regular Plan	Direct Plan
	Net Assets in Total Portfolio	200.00	110.00
	Net Assets in Main Portfolio	187.10	102.90
	Net Assets in Segregated Portfolio after Haircut*	9.68	5.32
	*Market value of investor holding will come down to the extent of haircut on the impacted security.		
	<u>Impact on investors:</u>		
	Existing Investors: All existing investors in the scheme as on the day of the credit event will be allotted equal number of units in the segregated portfolio as held in the main portfolio.		
	New Investors: Investors subscribing to the scheme will be allotted units only in the main portfolio based on its NAV.		
	Exiting Investors: Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.		
Mandatory Swing Pricing Framework	<p>Swing Pricing: Swing pricing refers to a process for adjusting a fund's net asset value (NAV) to effectively pass on transaction costs stemming from net capital activity (i.e., flows into or out of the fund) to the investors associated with that activity during the life of a fund.</p> <p>During market dislocation, following Swing Pricing Framework shall be applicable:</p> <ol style="list-style-type: none"> 1. The Swing Pricing Framework shall apply in case of scenarios related to net outflows from the schemes. 2. SEBI will determine 'market dislocation' either based on AMFI's recommendation or suo moto. 3. Once market dislocation is declared, SEBI will notify that swing pricing will be applicable for a specified period. 4. Mandatory swing pricing will apply for Applicable Schemes which have: <ol style="list-style-type: none"> i) High or Very High risk on the risk-o-meter (as of the most recent period at the time of declaration of market dislocation); and ii) Classify themselves in the cells A-III, B-II, B-III, C-I, C-II and C-III of Potential Risk Class (PRC) Matrix. 		

5. **Swing Factor:** Minimum Swing factor as per below matrix shall be made applicable to the above mentioned schemes and the NAV will be adjusted for the swing factor.

Swing factor			
Max Credit Risk of scheme →	Class A (CRV* >=12)	Class B (CRV* >=10)	Class C (CRV* <10)
Max Interest Rate Risk (CRV* <10) the scheme ↓			
Class I: (Macaulay duration <=1 year)	-	-	C-I: 1.5%
Class II: (Macaulay duration <=3 years)	-	B-II: 1.25%	C-II: 1.75%
Class III: Any Macaulay duration	A-III: 1%	B-III: 1.5%	C-III: 2%

* CRV - Credit Risk Value

6. **Illustration for Swing Pricing:**

Potential Risk Class (PRC)	A-III	B-II	B-III	C-I	C-II	C-III
Minimum Swing Factor as prescribed by SEBI	1%	1.25 %	1.50 %	1.50 %	1.75 %	2%
Unswung NAV	20.00	20.00	20.00	20.00	20.00	20.00

NAV after applying Swing Factor	19.80	19.75	19.70	19.70	19.65	19.60

7. **Impact on investors:**

- When swing pricing framework is triggered and swing factor is made applicable (for normal time or market dislocation, as the case may be), both the incoming and outgoing investors shall get NAV adjusted for swing factor.
- All redemptions above Rs. 2 lakhs and all subscriptions would be processed at the NAV after applying the swing factor on the day Swing pricing is triggered. Redemptions below 2 lakhs would be processed at the unswung NAV i.e. Normal NAV.

8. **Periodic Disclosures:**

Disclosures pertaining to NAV adjusted for swing factor along with performance impact will be disclosed in the prescribed format in the SID, scheme wise Annual Reports and Abridged summary thereof and on the website when swing pricing framework becomes applicable to the schemes

IDCW

The IDCW warrants shall be dispatched to the unitholders within seven working days from the record date. In the event of failure of dispatch of IDCW within the stipulated period, the AMC shall be liable to pay interest @ 15 per cent per annum to the unit holders for the period of such delay.

AMC will endeavor to credit the payouts of IDCW directly to the designated Bank A/c of the unitholders of Aditya Birla Sun Life Mutual Fund schemes through any of the available electronic mode (i.e. RTGS / NEFT / Direct Credit / NACH). AMC reserves the right to use any of the above mode of payment as deemed appropriate for all folios where the required information is available.

Redemption

Redemption or repurchase proceeds shall be transferred to the unitholders within three working days from the date of redemption or repurchase.

However, in case of exceptional circumstances mentioned in para 14.1.3 of SEBI Master Circular dated May 19, 2023, redemption or repurchase proceeds will be transferred / dispatched to Unitholders within the time frame prescribed for such exceptional circumstances. For further details, investors are requested to refer to Statement of Additional Information (SAI).

The Units can be Redeemed (i.e. sold back to the Mutual Fund) or Switched-out on every Business Day at the Redemption Price. The Redemption / Switch-out request can be made by way of a written request / pre-printed form / relevant tear off section of the Transaction Slip enclosed with the Account Statement, which should be submitted at / may be sent by mail to any of the ISCs.

In case an investor has purchased Units of the Scheme on more than one Business Day (either during the New Fund Offer Period, or on an ongoing basis), the Units purchased prior in time will be redeemed/switched-out first. Thus, in case of valid application for redemption/switch-out is made by the investor, those Units of the scheme which have been held for the longest period of time will be redeemed/switched-out first i.e. on a First-in-First-Out basis.

However, where Units under a Scheme are held under both Regular and Direct Plans and the redemption / Switch request pertains to the Direct Plan, the same must clearly be mentioned on the request (along with the folio number), failing which the request would be processed from the Regular Plan. However, where Units under the requested Option are held only under one Plan, the request would be processed under such Plan.

The Redemption would be permitted to the extent of clear credit balance in the Unit holder's account. The Redemption request can be made by specifying the rupee amount or by specifying the number of Units to be redeemed. If a Redemption request is for both, a specified rupee amount and a specified number of Units, the specified number of Units will be considered the definitive request. If only the Redemption amount is specified by the Unit holder, the AMC will divide the Redemption amount so specified by the Redemption Price to arrive at the number of Units. The request for Redemption of Units could also be in fractions, upto three decimal places. However, in case of units held in electronic (demat) mode, the redemption request can be given only in number of Units. Also Switch transactions are currently not available in case of units held in electronic (demat) mode. The minimum amount of Redemption may be changed in future by the AMC. If the balance in the account of the Unit holder does not cover the amount. Redemption request, then the Mutual Fund is authorised to close the account of the Unit holder and send the entire such (lesser) balance to the Unit holder.

In case the Units are held in the names of more than one Unit holder, where mode of holding is specified as "Joint", Redemption requests will have to be signed by all the joint holders. However, in cases of holding specified as 'Anyone or Survivor', any of the Unit holders will have the power to make Redemption request, without it being necessary for all the Unit holders to sign. However, in all cases, the Redemption proceeds will be paid only to the first named holder.

AMC will endeavor to credit the redemptions payouts directly to the designated Bank A/c of the unitholder through any of the available electronic mode (i.e. RTGS / NEFT / Direct Credit). AMC reserves the right to use any of the above mode of payment as deemed appropriate for all folios where the required information is available. AMC/Mutual Fund, however, reserves the right to issue a cheque / demand draft inspite of an investor opting for Electronic Payout.

Bank Details: In order to protect the interest of investors from fraudulent encashment of cheques, the current SEBI Regulations have made it mandatory for investors to mention in their application / Redemption request, the bank name and account number. Applications without these details are liable to be rejected.

Delay in payment of redemption / repurchase proceeds and despatch of IDCW warrants	The Asset Management Company shall be liable to pay interest to the unitholders at such rate as may be specified by SEBI for the period of such delay (presently @ 15% per annum)

Disclosure related to Risk-o-meter	<p>The Product labeling mandated by SEBI is to provide investors an easy understanding of the risk involved in the kind of product / scheme they are investing to meet their financial goals. The Riskometer categorizes the scheme of Fund under different levels of risk based on the respective scheme's investment objective, asset allocation pattern, investment strategy and typical investment time horizon of investors. Therefore, the scheme falling under the same level of risk in the Riskometer may not be similar in nature. Investors are advised before investing to evaluate a scheme not only on the basis of the Product labeling (including the Riskometer) but also on other quantitative and qualitative factors such as performance, portfolio, fund managers, asset manager, etc. and shall also consult their financial advisers, if they are unsure about the suitability of the scheme before investing. Further, pursuant to para 17.4 of SEBI Master Circular on Mutual Funds dated May 19, 2023, Risk-o-meters shall be evaluated on a monthly basis and Mutual Funds/AMCs shall disclose the Risk-o-meters along with portfolio disclosure for their schemes on AMCs website and on AMFI website within 10 days from the close of each month. Mutual Funds shall also disclose the risk level of schemes as on March 31 of every year, along with number of times the risk level has changed over the year, on AMCs website and AMFI website.</p>
Disclosure of Potential Risk Class (PRC) Matrix	<p>Pursuant to the para 17.5 of SEBI Master Circular on Mutual Funds dated May 19, 2023, all debt schemes are required to be classified in terms of a Potential Risk Class matrix consisting of parameters based on maximum interest rate risk (measured by Macaulay Duration (MD) of the scheme) and maximum credit risk (measured by Credit Risk Value (CRV) of the scheme). Mutual Funds are required to disclose the PRC matrix (i.e. maximum risk that a fund manager can take in a Scheme) along with the mark for the cell in which the Scheme resides on the front page of initial offering application form, SID, KIM, common application form and scheme advertisements in the manner as prescribed in the said circular. The scheme would have the flexibility to take interest rate risk and credit risk below the maximum risk as stated in the PRC matrix. Subsequently, once a PRC cell selection is done by the Scheme, any change in the positioning of the Scheme into a cell resulting in a risk (in terms of credit risk or duration risk) which is higher than the maximum risk specified for the chosen PRC cell, shall be considered as a fundamental attribute change of the Scheme in terms of Regulation 18(15A) of SEBI (Mutual Fund) Regulations, 1996.</p> <p>The Mutual Funds shall be required to inform the unitholders about the PRC classification and subsequent changes, if any, through SMS and by providing a link on their website referring to the said change.</p> <p>The Mutual Fund/ AMC shall also publish the PRC Matrix in the scheme wise Annual Reports and Abridged summary.</p>

$$\text{NAV (Rs.) per Unit} = \frac{\text{Market or Fair Value of the scheme's Investments} + \text{Current Assets (including accrued income)} - \text{Current Liabilities and Provisions (including accrued expenses)}}{\text{No. of Units outstanding under the scheme}}$$
